Portfolio: Wildlife Director

SUMMARY

I have been a home owner and resident in the Hoedspruit Wildlife Estate since August 2013 with a particular interest and passion for the Fauna and Flora of not only the green belt but also the residential area. I was involved with all the game capture and culling done on the Estate since I was appointed as the local state veterinarian in 2012, which means that I have a good idea of the problems we had in the past with too much game on the estate. It is very important that we follow a good game management plan in the Estate in order to have a balanced ecosystem because the Fauna and Flora is one of the main reasons we all live in the Estate.
